

MIGHTY RAIL™

by **MIGHTY LIFT™**

The most important word in "safety rail" is SAFETY. When you are putting a barrier between your people and your equipment or your machinery and a moving forklift truck, you should be able to depend on it to do its job. You can count on **Mighty Rail**.

More Steel Means More Protection

A 14-1/2" profile makes Mighty Rail 2-1/2" to 4-1/2" taller than the competition. That difference is solid steel. Three ridges in the 11 gauge steel put its profile to maximum use. If you need protection from moving objectsget behind Mighty Rail.

*Durable Yellow Powder Coat
Galvanized Finish (Optional)*

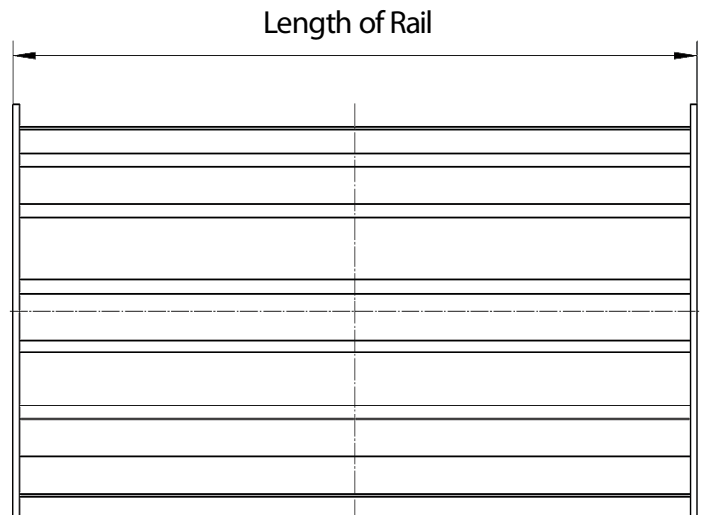

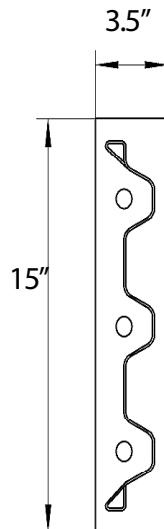

Designed & tested for up to 10,000 lbs @ 4 mph
(must be properly installed)

Protection for your People, your Plant and your Products

An Attractive Barrier

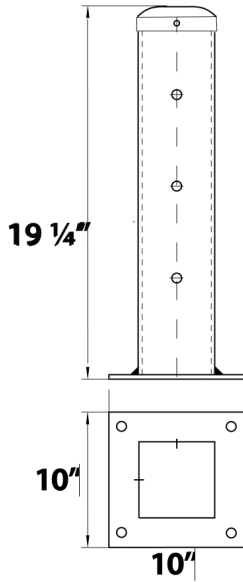

The OSHA yellow powder coat makes for a durable finish that will stay bright for many years.

A complete system of post and rail that combines to build any layout needed. Two post heights and six lengths of rail will cover most configurations from stock. All attaching hardware is included.

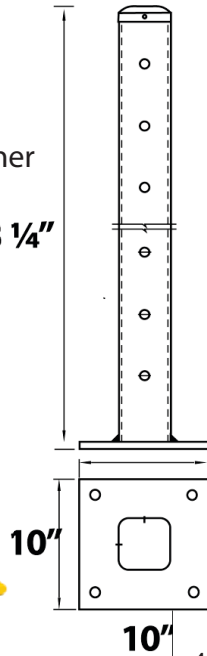

Post

- 4" square tube.
- 1/4" wall thickness
- 10" x 10" footplate
- Column cap
- Straight run or corner
- 18" and 42" tall

18" straight run post

42" straight run post

42" corner post

Anchor Bolts Sold Separately Not Included in part number

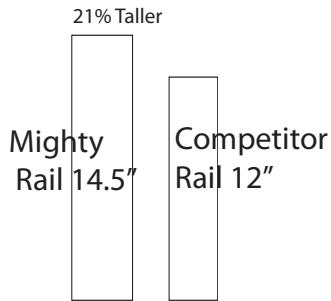

Part Number	Height	Weight	Description
P-CG-18C	18"	32.6	Corner Post
P-CG-18S	18"	32.6	Straight Post
P-CG-42C	42"	55.0	Corner Post
P-CG-42S	42"	55.0	Straight Post

Column Cap with set screws

Rails

If your looking for protection..... you be the judge

Three Rib Rail for Greater Strength

Note: All rail length are center to center on post (actual length = stated length less 4")

Part Number	Profile Height	Length	Weight lbs.	Description
P-GR-01B	14.5"	1'	12.8	Guard Rail (Bolt In) 1'
